

## What impact will these projects have on my Tomorrow River Schools tax rate?

The District will be retiring all existing debt associated with the previous school projects in 2027. This will allow the District to layer in the new referendum debt while maintaining a tax rate that is lower than the 2019-2020 rate and only slightly higher than the tax rate in 2020-2021 after the community saw a significant decrease.

## What about my neighbor who has a farm?

Agriculture is a big part of our school district community. It is important to understand the impact of this referendum accurately. Assessed value of agricultural land is based on its use in agriculture, rather than its fair market value, which is how most homeowners see their assessments. Assessed value of agriculture land tends to be significantly lower than fair market value. Guidelines and further land use value information and explanations can be found on the Wisconsin Department of Revenue website.
