

**Tomorrow River Schools is asking our community important referendum questions concerning the future of our district on**

**Tuesday, April 5, 2022**

**The district is considering an investment of \$25,700,000 to build additions, renovate, remodel and update our school.**

- There will be two questions for this referendum:
  1. A base \$21.3 million STEAM and secure entry project.
  2. A \$4.4 million project to improve other school areas.
- STEAM is short for science/technology/engineering/art/math, a coordination of applied skills and technology meant to prepare students for a rapidly evolving technological world.
- The project will construct a new 38,000 square-foot STEAM addition on the northeast corner of the school and deconstruct the existing tech ed building. We will remodel 5,800 square-feet of existing space where science and art are now located.
- New secure entries provided by consolidating and relocating elementary and middle school offices to the north side of the school.
- New secure entries provided by consolidating and relocating high school and district offices to the southwest side of the school.
- The project will remodel or update a total of 17,300 square-feet of libraries, food science and middle school classroom areas.
- The project addresses maintenance and infrastructure needs.
